

PRESS RELEASE

Date 10.10.2013

Kosovo Live Preliminary Results From Every Polling Center Using Tablet Computers

The Central election commission of Kosovo has selected iVote and partners to implement the system for live transmission of turnout and preliminary results for the November 3rd local elections from every single polling center in Kosovo. For the first time real-time election night reporting web site and mobile application will be provided to the public. From more than 2300 polling stations around Kosovo results data will be processed and published live. The data will be transferred using tablet computers and secured mobile network.

iVote will use its state of the art Demokra integrated election management information system. The iVote Demokra integrated elections management platform is innovative software platform that supports all the election processes from registration of voters, election day functions, results, up to management of mandates. The iVote Demokra allows for easy, practical and comprehensive evaluation and presentation of exit polls data, turnout and results for all sorts of elections. It supports different kinds of aggregated voting models.

About iVote:

iVote is company specialized in election modernization technologies. iVote's Demokra is an end-to-end state of the art election management platform, providing high security and transparency. iVote Demokra technology has been trusted by more than 105 million voters processed around the world. It has contributed to the most timely, transparent and credible election results in the history as democracies in many countries worldwide.
