Local Elections in Kosovo 2013 - iVote Demokra Enables Live Stream of Preliminary Results and Turnout

The November 3rd local elections in Kosovo have been processed using iVote Demokra technology. Elections results from 2366 polling stations all over Kosovo have been transmitted using tablet computers and published live on the official election's night results site of the Central Elections Commission of Kosovo. The results and turnout have been also available on a mobile app for IOS and Android based mobile devices.

Apart from the system for live transmission of turnout and preliminary results, the Central Election Commission also is using iVote Demokra technology for the Count and Results Center for official tracing of electoral materials, data entry, results consolidation, audit, investigation, reporting and mandates allocation.

The iVote Demokra integrated elections management platform is innovative software platform that supports all the election processes from registration of voters, election day functions, results, up to management of mandates. The iVote Demokra allows for easy, practical and comprehensive evaluation and presentation of exit polls data, turnout and results for all sorts of elections. It supports different kinds of aggregated voting models.

About iVote and iVote Demokra

iVote is company specialized in election modernization technologies. iVote's Demokra is an end-to-end state of the art election management platform, providing high security and transparency. iVote Demokra technology has been trusted by more than 107 million voters processed around the world. It has contributed to the most timely, transparent and credible election results in the history as democracies in many countries worldwide.
