iVote Delivers Electoral Operations Modernization Platform in Kosovo

iVote has delivered the Electoral Operations Modernization Platform (EOMP) to the Central Elections Commission of Kosovo. iVote has been a trustworthy, long term partner that contributes toward elections modernization and automation of processes in the CEC of Kosovo. The EOMP offers a digitized platform through which the Central Election Commission (CEC) will now be able to electronically implement some critical electoral processes that are currently done manually.

The system has four modules:

1. Automation of procedures for certification of political entities and candidates
2. Enabling voters to vote close to their residence
3. E-learning Management System
4. Automation of procedures for accreditation of election observers.

The access to the system is available 24/7, through majority of browsers and devices such as PCs, tablets and smart phones. The new modules will also have user friendly, intuitive public web portal, where electoral information will be presented to the public.

“Helping young democracies to strengthen their capacities and gain trust among citizens by using IT based systems is our main challenge and goal. With this platform, we provide a tool for better transparency and automation of election processes. This leads to reduction of human errors that is very important for building open society based on reliance and credibility of public institutions and services.” – Mr. Tomislav Zografski, CEO of iVote.

About iVote:

iVote is a company specializing in election modernization and e-learning technologies. iVote's Demokra is an end-to-end state-of-the-art election management platform, providing high security and transparency. iVote Demokra technology has been trusted by more than 121 million voters around the world. It has contributed to the most timely, transparent and credible election results in the history as democracies in many countries worldwide.
