iVote Demokra Elections Modernization Project in Albania 2017

iVote continues to contribute towards the election modernization processes in Albania delivering the upgraded Election Management solution, iVote Demokra, for the Parliamentary elections 2017 held on 25th of June. As a reliable partner of the Central Election Commission of Albania (CEC), iVote was assigned a contract by USAID to upgrade the software platform with additional modules.

iVote also has been providing full technical and professional consultancy services before, during and after the elections. iVote Demokra integrated elections platform covers all the aspects of the electoral activities and processes and enables smooth and automatic election flows.

“Being pioneer in the modernization processes of elections is a serious responsibility, but it is also a stimulating challenge. We are creating tailored software solution according to the client’s needs and requirements. Easy to use and intuitive design of the Demokra elections management system allows authorized CEC staff to complete their obligations in due time, without downtime”. – stated Mr. Tomislav Zografski, CEO of iVote.

Over 3.4 million registered voters from more than 5300 polling stations all over Albania have the right to participate in the elections. Ballot papers are processed in zonal counting centres and results are presented live to the public, ensuring transparency and straightforwardness of the elections.

About iVote

iVote is a company specializing in election modernization and e-learning technologies. iVote's Demokra is an end-to-end state-of-the-art election management platform, providing high security and transparency. iVote Demokra technology has been trusted by more than 130 million voters around the world. It has contributed to the most timely, transparent and credible election results in the history as democracies in many countries worldwide.
